# Go to Domains and click add Domains

The screenshot shows the RainLoop Admin Panel interface. On the left is a dark sidebar with a menu containing: General, Domains (highlighted), Login, Branding, Contacts, Security, Integrations, Plugins, Packages, and About. The main content area is titled "RainLoop — Admin Panel" and "Domains". It features two buttons: "+ Add Domain" and "+ Add Alias". Below these is a text box stating: "List of domains webmail is allowed to access. Click on the name to configure the domain." A table lists four domains: gmail.com, outlook.com, qq.com, and yahoo.com. Each row has a trash icon and a checkbox. The checkbox for gmail.com is checked, while the others are unchecked.

Domain	Trash	Check
gmail.com		<input checked="" type="checkbox"/>
outlook.com		<input type="checkbox"/>
qq.com		<input type="checkbox"/>
yahoo.com		<input type="checkbox"/>
